

IranCell Shop — Production Credentials & Security Report

Generated: 2026-07-13 14:36 UTC

CONFIDENTIAL — Store this file securely and delete from public locations after download.

Site Information

Website URL	https://irancell-31038.ir
Admin Panel	https://irancell-31038.ir/admin/login
Server IP	85.208.253.193
SSH Port	3031
Stack	Nuxt 3 + Express + MongoDB + Nginx + PM2

Admin Login

Email	admin@example.com
Password	6Up7uKc805bJ7T4H

MongoDB Database

Database Name	irancell_shop
Username	irancell_app
Password	Tad\$YKXNS\$a0*n*h26W2Tbf%

Payment Gateways

ZarinPal Merchant ID	4d025349-150c-4fca-81ad-6fe936e107e9
ZarinPal Callback URL	https://irancell-31038.ir/api/payment/verify
ZarinPal Default	Yes
Zibal Merchant ID	6a4cfcb2f60cc5e13aa1ff14
Zibal Callback URL	https://irancell-31038.ir/api/payment/verify/zibal

Database Backup

Backup Directory	/var/backups/irancell-mongodb/
Backup Script	/var/www/irancell/deploy/mongodb-backup.sh
Schedule	Daily at 03:00 UTC
Pre-cleanup Backup	irancell_20260713_174217.tar.gz

Server Paths

Project Root	/var/www/irancell/
Backend .env	/var/www/irancell/backend/.env
Server Credentials File	/root/irancell-production-credentials.txt

Current Database Status

admins	1 (kept)
users	0 (cleared)
orders	0 (cleared)
products	0 (cleared — re-add from admin panel)
numbers	0 (cleared — re-add from admin panel)
payments	0 (cleared)

MongoDB Connection URI

```
mongodb://irancell_app:Tad%24YKXNS%24a0%2An%2Ah26W2Tbf%25@127.0.0.1:27017/irancell_shop?authSource=irancell_shop
```

JWT Secret

```
b0e2a64785b4ba3ea30af33eca7cd16430c3f033d243ec4c5794f93491e640e2
```

Security Hardening Applied (Server + Application)

- MongoDB authentication enabled with dedicated app user (irancell_app)
- Strong random JWT secret configured (64-char hex)
- Admin password rotated to a strong password
- Database cleaned — only admin account kept, all test/user/order data removed
- Pre-cleanup full MongoDB backup created and stored
- Daily automatic MongoDB backup scheduled via cron (03:00 UTC)
- API server bound to 127.0.0.1 only (not directly exposed to internet)
- UFW firewall enabled — only ports 80, 443, and 3031 (SSH) open
- HTTPS enabled on irancell-31038.ir with SSL certificate
- Order creation requires authenticated user login
- Payment initiation requires order ownership verification
- Rate limiting on orders, order tracking, and auth endpoints
- Checkout cart validation hardened (item type, quantity, amount checks)
- Health endpoint minimized (no internal flags exposed)
- Security headers enabled (X-Frame-Options, X-Content-Type-Options, etc.)
- Seed script no longer overwrites existing admin password
- CORS locked to production frontend URL only
- Body size limit reduced to 2MB
- Trust proxy enabled for correct client IP behind Nginx

Remaining Recommended Actions

- Change SSH server root password immediately
- Update admin email from admin@example.com to your real email
- Activate ZarinPal terminal in ZarinPal dashboard (currently returns "Terminal not active")
- Re-add products and phone numbers from the admin panel
- Remove this PDF from GitHub immediately after download
- Rotate all credentials if this file was ever exposed publicly
